

Founded in 1995, our mission is to make a profit and use it entirely for sustainable development. In 2023, HUMANA People to People organisations worked with education, health, community dev. and environment in 1.584 projects in 46 countries.

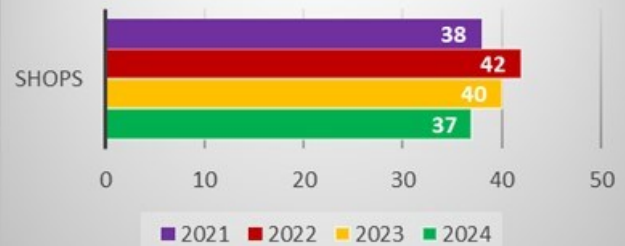

Our business model is to run second hand shops in Germany which is also a contribution to sustainable consumption. We offer a large range of women's, men's and children's clothing as well as vintage clothing.

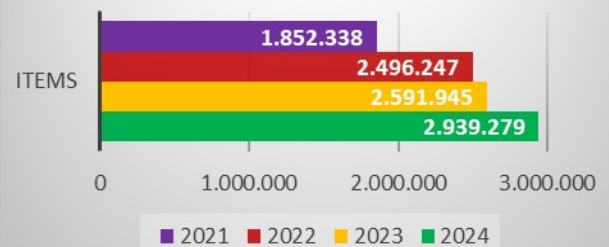

Our main supplier is HUMANA Kleider-sammlung GmbH who collects and sorts used clothes in Germany. At the end of 2024, our 342 employees (226 FTE) of many nationalities were running 37 shops with a sales area of 13,739 m². You find our shops in Berlin, Bochum, Dresden, Hamburg, Köln, Krefeld and Leipzig.

**Our re-use finances collection & sorting.**  
Public Corona-supports were helpful.

**Economic sustainability: normally, we do not depend on government subsidies.**

We are a social business. These are created solely for the purpose of solving a social or environmental problem; private persons don't take any dividend.

We pay wages to our staff and related costs such as public health insurance, unemployment insurance etc. We also pay full VAT and corporate tax.

We support sustainable development among other by donating to HUMANA People to People Deutschland e.V.

As in previous years, we sourced our electricity entirely from certified green supplier Naturstrom so that we create almost no CO2-emissions for electricity.

Paying rents for physical shops helps keeping the inner cities alive.

Our decent prices help reduce inequalities. At the same time, more and more of our customers buy second hand clothes in our shops because they want to contribute to a better world.
